		"Z4.An" electronic aevlce comprlsng: a host unit including an operating system and a graphical user interface (GUI display having a scroll bar feature and operably associated with said operating system; a touch control unit operable so as to generate a contact signal in response to contact with an object; a computing unit coupled electrically to said touch control unit so as to receive the contact signal therefrom, said computing unit being configured to generate different control signals, each of which is generated in accordance with a contact position of the object with said touch control unit; and a transmission interface including a set of transmission lines interconnecting electrically said computing unit and said host unit, each of said transmission lines being used to transmit a respective one of the control signals to said host unit; said operating system of said host unit being responsive to the control signal received from said transmission interface for scrolling control of said GUI display	US-PGPUB; USPAT; EPO; JPO; DERWENT; IBM_TDB	OR	ON	2007/04/06 18:39
